

3-4-Axis CNC machining center with moving portal, especially designed for milling, drilling, threading and cutting bars or workpieces made of aluminium, PVC, light alloys and steel.

Technical features:

- Main structures made of electro-welded steel, normalized and worked with CNC machine tools.
- 3-4-Axis movement controlled by high-precision brushless servomotors.
- Electric spindle (5,5 kW in S1), with ISO 30 tool connection suitable for material removal processes during milling and drilling operations.
- Tool magazine holding up to 8 tools, placed on the back side of the moving portal.
- Clamps movement automatically set, controlled by CNC.
- Standard versions 4, 7 and 9 meters.
- Double working area (version 7 and 9 meters).
- Chips conveyor plate.
- Safety light curtains system located in front of the machine.
- Safety guards in electro-welded net on the three sides of the machine.
