

Zeus 4 axis is our CNC leading profile machining center developed to satisfy the most demanding production requirements across a broad range of industrial applications. The Zeus 4 axis series has been designed for drilling, milling and tapping operations on profiles made of aluminium, steel and light alloys.

Technical features:

- Robust structures made of electro-welded steel, tempered and worked with CNC machine tools.
- 4-Axis movement controlled by high-precision brushless servomotors.
- The 4 axis series features a tilting head providing $\pm 90^\circ$ of spindle tilt.
- High-powered electrospindle (10 kw in S1), with HSK F63 tool connection and liquid cooled for hard removal processes during milling and drilling operations.
- Tool magazine holding up to 16 tools, placed on the back side of the moving portal.
- Milling cutter diam. 120 mm.
- Clamp movement automatically set, controlled by CNC (optional: independent clamp positioning).
- Standard versions 4, 7 and 9 meters.
- Double working area (version 7 and 9 meters).
- Chip conveyor plate placed below the working area.
- Safety light curtains system located in front of the machine.
